EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Steven J. Solomon on 10/12/2007.

The application has been amended as follows:

The claims:

1. (Currently Amended) A protective layer comprising a viscoelastic foam substrate and a flexible skin at least partially enclosing said foam substrate, said flexible skin having a plurality of vent holes provided therein in a protective zone of said flexible skin overlying said foam substrate, said vent holes providing fluid communication between the ambient environment and a portion of the surface of said foam substrate that underlies said protective zone, said flexible skin being a barrier to exhaustion of gas pressure from within said foam substrate to the ambient atmosphere on impact of said foam substrate, said plurality of vent holes being effective to regulate the local rigidity of said protective layer by permitting gas to escape at said protective zone at a rate that is dependent on the number and size of said vent holes through said flexible skin in said protective zone, wherein said viscoelastic foam substrate is a continuous foam layer in the vicinity under said vent holes.

Add the following new claim:

34. (new) A protective layer according to claim 1, said viscoelastic foam substrate being seamless.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: Note that the examiner's amendment is sufficient to overcome the art rejections and sufficient to place the instant claims in condition for allowance. WO '489 discloses a safety helmet comprising a flexible outer shell 144 and a foam liner 142 as shown in figure 15. At least some of the openings in the shell correspond in position with openings in the foam liner to permit flow of air to the interior of the liner. The openings extend through the thickness of the foam liner as shown in figures 2, 3 and 15. Accordingly, WO'489 taken alone or in combination with several references does not teach or suggest the claimed invention, namely a continuous foam layer in the vicinity under said vent holes of the skin layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hai Vo whose telephone number is (571) 272-1485. The examiner can normally be reached on Monday through Thursday, from 9:00 to 6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rena Dye can be reached on (571) 272-3186. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
